Purchase Transaction Security and SSL Certificate

All your transactions on our site with your credit card are secured with a 256bitSSL certificate. Your card information is transmitted encrypted with 256-bit protection. You can understand in which state the SSL (Secure Socket Layer) connection is active by the lock icon that will be displayed right next to the address bar of your browser when you go to our page where you enter your card information during the ordering process.

The lock picture in the lower right corner of the page where you enter your Credit Card information shows that this page is encrypted with SSL, and when you click on it, it indicates which company the encryption belongs to. The membership and personal information you use while registering on our website is kept confidential and cannot be shared with anyone without your consent. SSL software ensures that the information flow between the customer-business-bank is encrypted using 256-bit technologies, which are mathematically very low and technically difficult to decrypt.
